APEX
SECURITY DOORS & SCREENS

1. **Co-extruded Locking Block –** Secures mesh into the frame; cannot be disassembled. UV-stabilised PVC for durability.
2. **Captive Rigid Insulator** – Prevents corrosion and seals edges from moisture and debris.
3. **Anchor** – Holds mesh under extreme pressure, resisting repeated impact.
4. **High-Tensile 304 Stainless Steel Mesh** – Duo-layer folded 180° for maximum strength; powder-coated for protection.
5. **6063-T6 Extruded Aluminium Frame** – Architectural-grade, tempered for impact resistance and corrosion protection.

Our Standard Colour Palette

Reduce lead time with our 11 locally stocked finishes. These colours are kept in stock for quick production and are available throughout our entire range of security and decorative doors.
